

## **Requirements**

The parts requirements in this document/database should be part of a contract through a statement of work (SOW), part specification, or other contractual process requiring a particular level of quality, reliability or derating. This document/database can be used in its entirety or by product section. Nothing in this document/database is binding unless imposed explicitly through a specific contract requirement. This document/database is a set of guidelines, with built-in requirements, when contractually required, to be used by DoD and its system builders for support in the selection, design, procurement, and assessment of parts used in military systems.
